INDEPENDENT AUDITORS' REPORT

TO THE MEMBERS OF NATHMALL GIRDHARILAL STEELS LIMITED

Report on the Financial Statements

We have audited the accompanying financial statements of NATHMALL GIRDHARILAL STEELS LIMITED ("the Company"), which comprises the Balance Sheet as at 31st March, 2018, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of the changes in Equity and the Statement of Cash Flows for the year then ended and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the Indian Accounting Standards (Ind AS) prescribed under Section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, and other accounting principles generally accepted in India.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit.

We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit of the financial statements in accordance with the Standards on Auditing specified under section 143(10) of the Act. Those Standards require that we comply

CHAN

Chartered

Chartered Accountants

with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the financial statements that give true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by Company's Directors, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the financial statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2018, its profit (including other comprehensive income), the changes in equity and its cash flows for the year ended on that date.

Report on other Legal and Regulatory Requirements

- As required by the Companies (Auditor's Report) Order, 2016("the Order") issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the Annexure "A" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
- 2. As required by section 143(3) of the Act, we report that:
 - We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - b) In our opinion proper books of accounts as required by law have been kept by the Company so far as it appears from our examination of those books.

Chartered

Chartered Accountants

- c) The Balance Sheet, the Statement of Profit and Loss, the Statement of the Changes in Equity and the Statement of Cash Flow dealt with by this Report are in agreement with the books of accounts.
- d) In our opinion, the aforesaid financial statements comply with the Indian Accounting Standards specified under Section 133 of the Act.
- e) On the basis of written representations received from the directors as on 31st March, 2018 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2018 from being appointed as a director in terms of Section 164(2) of the Act.
- f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate report in Annexure "B".
- g) With respect to the other matters to be included in the Auditors' Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
 - The Company does not have any pending litigations which would impact its financial position.
 - ii. The Company has made provisions, as required under the applicable law or accounting standards, for material foreseeable losses, if any, on long term contracts including derivative contracts.
 - There were no amounts which were required to be transferred by the Company to the Investor Education and Protection Fund.

FINANCIAL STATEMENTS OF NATHMALL GIRDHARILAL STEELS LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of MATHMALL GIRDHARILAL STEELS LIMITED ("the Company") as of March 31, 2018 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if

such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting, assessing obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and evaluating the evaluation and evaluation and evaluation and evaluating the evaluation and e

Chartered Accountants

effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over

Chartered

COMPANY OVERVIEW

Nathmall Girdharilall Steels Ltd. (hereinafter referred as "the Company") was incorporated on 11th December 1984. The Company has its registered office at Kolkata. The Company is involved in trading activities.

BASIS OF PREPARATION AND COMPLIANCE WITH IND AS

- a) For all periods upto and including the year ended March 31, 2017, the Company had prepared its financial statements in accordance with Generally Accepted Accounting Principles (GAAP) in India and complied with the accounting standards (Previous GAAP) as notified under Section 133 of the Companies Act, 2013 read together with Rule 7 of the Companies (Accounts) Rules, 2014, to the extent applicable, and the presentation requirements of the Companies Act, 2013.
- b) Pursuant to the notification dated February 16, 2015, issued by the Ministry of Corporate Affairs, the Company has adopted Indian Accounting Standards notified under Section 133 read with Rule 4A of the Companies (Indian Accounting Standards) Rules, 2015, Companies (Indian Accounting Standards) (Amendment) Rules, 2016 as amended and the relevant provisions of the Companies Act, 2013 (collectively, "Ind AS") with effect from April 1, 2017 and the Company is required to prepare its financial statements in accordance with Ind AS for the year ended March 31, 2018, for the first time. The transition to Ind AS was carried out in accordance with Ind AS 101 First- Time Adoption of Indian Accounting Standards with the date of transition as April 01, 2016. Refer note 36 for descriptions of the effect of the transition and reconciliations required as per Ind AS 101.

c) Basis of measurement

The financial statements have been prepared on a going concern basis using historical cost convention and on an accrual method of accounting, except for certain items that are measured at fair values/amortised cost, as explained in the accounting policies.

d) Operating Cycle

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013 and Ind AS 1 – Presentation of Financial Statements. Paragraph 66 (c) of Ind AS 1 provides that an asset shall be classified as current when an entity expects to realise the asset within a period of twelve months after the reporting period. To determine the expectation of the entity, the commercial reality of the transaction are considered. If the loans have been given with an understanding that these loans be called for repayment and these are recoverable on demand, it is classified as current asset.

Paragraph 69 (c) of Ind AS 1 provides that a liability should be classified as current if the liability is due to be settled within twelve months after the reporting period. In cases where the loan/ inter- corporate deposit would become due immediately as and when demanded and presuming that the entity does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period, it is classified as current.

U27101WB1984PLC038271

SIGNIFICANT ACCOUNTING POLICIES

a) Revenue recognition

As per the definition of Revenue in Ind AS 18, "revenue is the gross inflow of economic benefits during the period arising in the course of the ordinary activities of an entity when those inflows result in increases in equity, other than increases relating to contributions from equity participants." Further, as per Ind AS 18, revenue includes only the gross inflows of economic benefits received / receivable by the entity on its own account. Amounts collected on behalf of third parties such as sales taxes, goods and service taxes and value added taxes are not economic benefits which flow to the entity and do not result in increases in equity. Therefore, they are excluded from revenue. Similarly, in an agency relationship, the gross inflow of economic benefits include amounts collected on behalf of the principal and which do not result in increases in equity for the entity. The amounts collected on behalf of the principal are not revenue.

i. Interest income

Interest income from debt instruments which are accounted for at amortized cost is recognized using the effective interest rate method. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the gross carrying amount of a financial asset. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses.

ii. Dividends

Dividend income is recognized in the statement of profit and loss only when the right to receive payment is established, provided it is probable that the economic benefits associated with the dividend will flow to the Company, and the amount of the dividend can be measured reliably.

iii. Sale of Service

Revenue from rendering services is recognized when the outcome of a transaction can be estimated reliably by reference to the stage of completion of the transaction. The outcome of a transaction can be estimated reliably when the amount of revenue, stage of completion of the transaction and cost incurred or to-be incurred, at the end of the reporting period can be measured reliably and it is probable that the economic benefits associated with the transaction will flow to the company.

b) Property, plant and equipment

i. Recognition and Measurement

PPE is recognized when it is probable that future economic benefits associated with the item will flow to the company and the cost of the item can be measured reliably. PPE is stated at original cost net of tax/duty credits availed, if any, less accumulated depreciation and cumulative impairment, if any. Property, plant and equipment acquired on hire purchase basis are recognized at their cash values. Cost includes professional fees related to the acquisition of PPE and for qualifying assets, borrowing costs capitalized in accordance with the company's accounting policy.

ii. Subsequent costs and disposal

Subsequent expenditure relating to Property, Plant and Equipment is capitalized only when it is probable that future economic benefits associated with the Item will flow to the Company and the

U27101WB1984PLC038271

cost of the item can be measured reliably. All other repairs and maintenance costs are charged to the Statement of Profit and Loss as incurred. The cost and related accumulated depreciation are eliminated from the financial statements, either on disposal or when retired from active use and the resultant gain or loss are recognized in the Statement of Profit and Loss.

iii. Capital-work-in-progress

Assets in the course of construction are capitalized in capital work in progress account. At the point when an asset is capable of operating in the manner intended by management, the cost of construction is transferred to the appropriate category of property, plant and equipment. Costs (net of income) associated with the commissioning of an asset are capitalised until the period of commissioning has been completed and the asset is ready for its intended use.

iv. Depreciation, depletion and amortisation expense

Depreciation is recognized using written down value method so as to write off the cost of the assets (other than freehold land and properties under construction) less their residual values over their useful lives specified in Schedule II to the Companies Act, 2013, or in the case of assets where the useful life was determined by technical evaluation, over the useful life so determined. Depreciation method is reviewed at each financial year end to reflect the expected pattern of consumption of the future economic benefits embodied in the asset. The estimated useful life and residual values are also reviewed at each financial year end and the effect of any change in the estimates of useful life/residual value is accounted on prospective basis.

Where cost of a part of the asset ("asset component") is significant to total cost of the asset and useful life of that part is different from the useful life of the remaining asset, useful life of that significant part is determined separately and such asset component is depreciated over its separate useful life.

Depreciation on additions to/deductions from, owned assets is calculated pro rata to the period of use.

Depreciation charge for impaired assets is adjusted in future periods in such a manner that the revised carrying amount of the asset is allocated over its remaining useful life.

Assets acquired under finance leases are depreciated on a straight line basis over the lease term. Where there is reasonable certainty that the company shall obtain ownership of the assets at the end of the lease term, such assets are depreciated based on the useful life prescribed under Schedule II to the Companies Act, 2013 or based on the useful life adopted by the company for similar assets.

c) Intangible assets

Intangible assets are recognised when it is probable that the future economic benefits that are attributable to the asset will flow to the enterprise and the cost of the asset can be measured reliably. Intangible assets are stated at original cost net of tax/duty credits availed, if any, less accumulated amortisation and cumulative impairment. Administrative and other general overhead expenses that are specifically attributable to acquisition of intangible assets are allocated and capitalised as a part of the cost of the intangible assets.

U27101WB1984PLC038271

Intangible assets are amortised on straight line basis over the estimated useful life. The method of amortisation and useful life is reviewed at the end of each accounting year with the effect of any changes in the estimate being accounted for on a prospective basis.

Amortisation on impaired assets is provided by adjusting the amortisation charge in the remaining periods so as to allocate the asset's revised carrying amount over its remaining useful life.

d) Non-current assets held for sale

Non-current assets and disposal groups are classified as held for sale if their carrying amount is intended to be recovered principally through a sale (rather than through continuing use) when the asset (or disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sale of such asset (or disposal group) and the sale is highly probable and is expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets and disposal groups classified as held for sale are measured at lower of their carrying amount and fair value less costs to sell.

e) Impairment of assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a posttax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the statement of profit and loss.

An assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit and loss.

U27101WB1984PLC038271

f) Financial instruments

Transaction prices and fair value at initial recognition

As per Ind AS in many cases the transaction price, i.e. the price paid (received) for a particular asset (liability), will represent the fair value of that asset (liability) at initial recognition, (e.g. that might be the case when on the transaction date the transaction to buy an asset takes place in the market in which the asset would be sold).

When determining whether fair value at initial recognition equals the transaction price, an evaluation is done by taking into account the factors specific to the transaction and to the asset or liability.

The fair value of a financial liability with a demand feature (e.g. a demand deposit) is not less than the amount payable on demand, discounted from the first date that the amount could be required to be paid.

From a measurement perspective, the Initial fair value, required under Ind AS 109, should be based on Ind AS 113 principles. Ind AS 113 requires fair value of demand deposits to be at the amounts which can be demanded by the counterparty. I herefore, in case of deposit liability from customer, the entire amount of deposit that can be demanded by customer can be treated as the fair value. Therefore, no discounting would be required. Also, Ind AS 18 does not require interest accrual on advance payments from customers to be adjusted in the future sale consideration. On the same analogy discounting of current items are not done.

Financial assets and/or financial liabilities are recognized when the company becomes party to a contract embodying the related financial instruments. All financial assets, financial liabilities and financial guarantee contracts are initially measured at transaction values and where such values are different from the fair value, at fair value. Transaction costs that are attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from as the case may be, the fair value of such assets or liabilities, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

The financial assets and financial liabilities are offset and presented on net basis in the Balance Sheet when there is a current legally enforceable right to set-off the recognized amounts and it is intended to either settle on net basis or to realize the asset and settle the liability simultaneously.

Financial assets:

Recognition: Financial assets include Investments, Trade receivables, Advances, Security Deposits, Cash and cash equivalents. Such assets are initially recognized at transaction price when the Company becomes party to contractual obligations. The transaction price includes transaction costs unless the asset is being fair valued through the Statement of Profit and Loss.

Classification: Management determines the classification of an asset at initial recognition depending on the purpose for which the assets were acquired. The subsequent measurement of financial assets depends on such classification.

- All recognized financial assets are subsequently measured in their entirety at amortised cost or at fair value depending on the classification of the financial assets as follows:
 - Investments in debt Instruments that are designated as fair value through profit or loss (FVTPL) at fair value
 - Other investments in debt instruments at amortised cost, subject to following conditions:

U27101WB1984PLC038271

The asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and

The contractual terms of instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

- Debt instruments that meet the following conditions are subsequently measured at fair value through other comprehensive income (FVTOCI) (unless the same are designated as fair value through profit or loss)
 - The asset is held within a business model whose objective is achieved both by collecting contractual cash flows and selling financial assets; and
 - b. The contractual terms of instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.
- iii. Investment in preference shares are treated as equity instruments if the same are convertible into equity shares or are redeemable out of the proceeds of equity instruments issued for the purpose of redemption of such investments. Investment in preference shares not meeting the aforesaid conditions are classified as debt instruments at FVTPL.
- iv. Investments in equity instruments are classified as at FVTPL, unless the related instruments are not held for trading and the company irrevocably elects on initial recognition to present subsequent changes in fair value in Other Comprehensive Income.
- v. For financial assets that are measured at FVTOCI, income by way of interest, dividend and exchange difference (on debt instrument) is recognised in profit or loss and changes in fair value (other than on account of such income) are recognized in Other Comprehensive Income and accumulated in other equity. On disposal of debt instruments measured at FVTOCI, the cumulative gain or loss previously accumulated in other equity is reclassified to profit or loss. In case of equity instruments measured at FVTOCI, such cumulative gain or loss is not reclassified to profit or loss on disposal of investments.
- II. Impairment of Financial Assets using Expected Credit Loss Model under Ind AS 109 Trade Receivables Ind AS 109 requires testing of impairment for certain financial asset under what is known as expected credit loss (ECL) model. This applies to debt instruments recorded at amortised cost or at fair value through other comprehensive income, such as loans, debt securities and trade receivables, lease receivables and most loan commitments and financial guarantee contracts.

ECL Model requires recognition of a provision for bad debt/ impairment for either 12- month or lifetime expected credit losses (ECLs), depending on whether there has been a significant increase in credit risk since initial recognition. The measurement of ECLs reflects a probability-weighted outcome, the time value of money and the best available forward-looking information.

Ind AS 109, provides an option for entities to work out their impairment provision based on a simplified approach. The simplified approach does not require the entities to track the changes in credit risk. Instead it requires the recognition of lifetime ECLs at all times. For trade receivables or lease receivables, the entities has applied the simplified approach using a provision matrix as a practical expedient for determining ECL on trade receivables.

For trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 18, the Company always measures the loss allowance at an amount equal to lifetime expected credit losses.

U27101WB1984PLC038271

III. A financial asset is primarily derecognised when:

- i. the right to receive cash flows from the asset has expired, or
- ii. the company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a pass-through arrangement; and (a) the company has transferred substantially all the risks and rewards of the asset, or b) the company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset. On derecognition of a financial asset in its entirety, the difference between the carrying amount measured at the date of derecognition and the consideration received is recognised in profit or loss.

Classification of debt or equity

Debt or equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

IV. Financial liabilities:

Financial liabilities, including derivatives and embedded derivatives, which are designated for measurement at FVTPL are subsequently measured at fair value. Borrowings, trade payables and other financial liabilities are initially recognized at the value of the respective contractual obligations. They are subsequently measured at amortised cost. Any discount or premium on redemption / settlement is recognised in the Statement of Profit and Loss as finance cost over the life of the liability using the effective interest method and adjusted to the liability figure disclosed in the Balance Sheet.

Financial liabilities are derecognised when the liability is extinguished, that is, when the contractual obligation is discharged, cancelled and on expiry.

V. Equity Instruments:

Equity Instruments are recognised at the value of the proceeds, net of direct costs of the capital issue.

g) Borrowing costs

EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial liability or a shorter period, where appropriate, to the amortised cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options).

h) Leases

Determining whether an arrangement contains lease

At inception of an arrangement, the Company determines whether the arrangement is or contains a lease. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement. Arrangements containing a lease have been evaluated as on the date of transition i.e. April 01, 2016 in accordance with Ind-AS 101 First-time Adoption of Indian Accounting Standard for finance or operating lease, on the basis of facts and circumstances existing as at that date.

U27101WB1984PLC038271

A lease is classified at the inception date as a finance lease or an operating lease. A lease that transfers substantially all the risks and rewards incidental to ownership to the Company is classified as a finance lease. Finance leases are capitalised at the commencement of the lease at the inception date fair value of the leased property or, if lower, at the present value of the minimum lease payments.

Company as a lessee

Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognised in finance costs in the statement of profit and loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the Company's general policy on the borrowing costs. Contingent rentals are recognised as expenses in the periods in which they are incurred.

A leased asset under Finance Lease is depreciated over the useful life of the asset. However, if there is no reasonable certainty that the Company will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term. Operating lease payments are recognised as an expense in the statement of profit and loss on a straight-line basis over the lease term, unless the payments are structured to increase in line with general inflation to compensate for the lessor's expected inflationary cost increase.

Company as a lessor

Leases in which the Company does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

Inventories

Inventories are valued after providing for obsolescence, as under:

- Raw materials, components, construction materials, stores, spares and loose tools at lower of cost
 or net realisable value. However, these items are considered to be realisable at cost if the finished
 products in which they will be used, are expected to be sold at or above cost.
- Manufacturing work-in-progress at lower of weighted average cost, including related overheads, or net realisable value. In the case of qualifying assets, cost also includes applicable borrowing costs vide policy relating to borrowing costs.
- Finished goods and stock-in-trade (in respect of goods acquired for trading) at lower of weighted average cost or net realisable value. Cost includes related overheads and duty paid/payable on such goods wherever applicable.

Assessment of net realisable value is made in each subsequent period and when the circumstances that previously caused inventories to be written-down below cost no longer exist or when there is clear evidence of an increase in net realisable value because of changed economic circumstances, the write-down, if any, in the past period is reversed to the extent of the original amount written-down so that the resultant carrying amount is the lower of the cost and the revised net realisable value.

U27101WB1984PLC038271

Taxation

Tax expense represents the sum of current tax and deferred tax. Current tax is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the reporting date and includes any adjustment to tax payable in respect of previous years.

Deferred tax is provided using the balance sheet method, on all the temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes, on carry forward of unused tax credits and unused tax loss. Deferred tax provision is subject to following exceptions:

- deferred income tax is not recognized on the initial recognition (including MAT) of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss, and
- deferred tax assets are recognized only to the extent that it is more likely than not that they will be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date. Tax relating to items recognized outside profit or loss is recognised outside profit or loss (either in other comprehensive income or equity).

The carrying amount of deferred tax assets (including MAT credit available) is reviewed at each reporting date and is adjusted to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are offset when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

k) Employee benefits

Short term employee benefits:

Employee benefits such as salaries, wages, short term compensated absences, expected cost of bonus, exgratia and performance-linked rewards falling due wholly within twelve months of rendering the service are classified as short term employee benefits and are expensed in the period in which the employee renders the related service.

Provisions, contingent liabilities and contingent assets

Provisions represent liabilities for which the amount or timing is uncertain. Provisions are recognized when the Company has a present obligation (legal or constructive), as a result of past events, and it is probable that an outflow of resources, that can be reliably estimated, will be required to settle such an obligation.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows to net present value using an appropriate pre-tax discount rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. Unwinding of the discount is recognized in profit or loss as a finance cost. Provisions are reviewed at each reporting date and are adjusted to reflect the current best estimate.

U27101WB1984PLC038271

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

Contingent assets are not recognised but disclosed in the financial statements when an inflow of economic benefits are probable.

m) Earnings per share

The Company presents basic and diluted earnings per share ("EPS") data for its equity shares. Basic EPS is calculated by dividing the profit or loss attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during the year. Diluted EPS is determined by adjusting the profit or loss attributable to equity shareholders and the weighted average number of equity shares outstanding for the effects of all dilutive potential equity shares.

n) Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and on hand and short-term money market investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

o) Exceptional Items:

Certain occasions, the size, type or incidence of an item of income or expense, pertaining to the ordinary activities of the Company is such that its disclosure improves the understanding of the performance of the Company, such income or expense is classified as an exceptional item and accordingly, disclosed in the notes accompanying to the financial statements.

p) Fair Value Measurement:

The Company measures certain financial instruments at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

U27101WB1984PLC038271

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 Valuation techniques for which the lowest input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the balance sheet on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

q) Critical accounting judgements and estimation uncertainty

The preparation of the financial statements in conformity with Ind AS requires the directors of the Company to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Impact on investments in joint venture and associates & Impact of changes in Related Party

On the transition date an assessment has been made w.r.t. identification of Joint Ventures, Associates and Related Parties as per Ind AS vis a vis previous IGAAP. Based upon the assessment made by the management, the necessary reclassification has been made and has been disclosed accordingly. The following guiding factors have been evaluated for the purpose of arriving at an informed conclusion. As per Indian Accounting Standard (Ind AS 28), "Investments in Associates and Joint Ventures", there is a requirement of assessment that if an entity holds, directly or indirectly 20 per cent or more of the voting power of the investee, it is presumed that the entity has significant influence, unless it can be clearly demonstrated that this is not the case. Based on assessment of significant influence and terms of joint arrangement carried out by the Company under Ind AS the management is of the view that under the Indian Accounting Standard the conditions are not being met as a result, equity investment in these entities have been assessed to be carried at fair value through other comprehensive income:

As per IND AS 24 dealing with RELATED PARTY DISCLOSURES, the Standard requires disclosure of related party relationships, transactions and outstanding balances, including commitments, in the consolidated and

U27101WB1984PLC038271

separate financial statements of a parent or investors with joint control of, or significant influence over, an investee presented in accordance with Ind AS 110, Consolidated Financial Statements, or Ind AS 27, Separate Financial Statements. This Standard also applies to individual financial statements. The guiding factor for the identification of the Related Parties have been made on below parameters.

In considering each possible related party relationship, attention is directed to the substance of the relationship and not merely the legal form. In the context of this Standard, the following are not related parties:

- (a) two entities simply because they have a director or other member of key management personnel in common or because a member of key management personnel of one entity has significant influence over the other entity.
- (b) two joint venturers simply because they share joint control of a joint venture.
- (c) (i) providers of finance,
 - (iii) trade unions,
 - (iii) public utilities, and
- (iv) departments and agencies of a government that does not control, jointly control or significantly influence the reporting entity, simply by virtue of their normal dealings with an entity (even though they may affect the freedom of action of an entity or participate in its decision making process).
- (d) a customer, supplier, franchisor, distributor or general agent with whom an entity transacts a significant volume of business, simply by virtue of the resulting economic dependence.

r) Segment Reporting

The management is of the view that the as per Ind AS 108 "Operating Segments" specified under section 133 of the Companies Act, 2013, there are no reportable operating segments applicable to the Company.

Recent Accounting Pronouncement

The Company has not early adopted the following new standards or amendments to standards in preparing these financial statements.

Ind AS 115, Revenue from contracts with customers

MCA vide its notification dated 28 March 2018, notified Ind AS 115, "Revenue from Contracts with Customers". Ind AS 115 establishes a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. Ind AS 115 will supersede the current revenue recognition standard Ind AS 18 "Revenue", Ind AS 11 "Construction Contracts", when it becomes effective.

The core principle of Ind AS 115 is that an entity should recognise revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Specifically, the standard introduces a 5-step approach to revenue recognition:

- Step 1: Identify the contract(s) with a customer
- Step 2: Identify the performance obligation in contract
- Step 3: Determine the transaction price
- Step 4: Allocate the transaction price to the performance obligations in the contract
- . Step 5: Recognise revenue when (or as) the entity satisfies a performance obligation

U27101WB1984PLC038271

Under Ind AS 115, an entity recognises revenue when (or as) a performance obligation is satisfied, i.e. when 'control' of the goods or services underlying the particular performance obligation is transferred to the customer.

The new revenue recognition standard is effective from 1 April 2018. The Company has completed its evaluation of the possible impact of Ind AS 115.

35 Segment Reporting

The management is of the view that the as per Ind AS 108 "Operating Segments" specified under section 133 of the Companies Act, 2013, there are no reportable operating segments applicable to the Company.

36 Transition to Ind AS

36.1 Basis for Preparation

For all period up to and including the year ended March 31, 2017, the Company has prepared its financial statements in accordance with generally accepted accounting principles in India (Indian GAAP). These financial statements for the year ended March 31, 2018 are the Company's first annual Ind AS financial statements and have been prepared in accordance with Ind AS.

The accounting policies set out in note 3 have been applied in preparing the financial statements for the year ended 31 March 2018, the comparative information presented in these financial statements for the year ended 31 March 2017 and in the preparation of an opening ind AS balance sheet at 1 April 2016 (the date of transition). This note explains the principal adjustments made by the Company in restating its financial statements prepared in accordance with previous GAAP, and how the transition from previous GAAP to Ind AS has affected the Company's financial position, financial performance and cash flows.

36.2 Exceptions and Exemptions Applied

Ind AS 101 "First-time adoption of Indian Accounting Standards" (hereinafter referred to as Ind AS 101) allows first time adopters certain exemptions from the retrospective application of certain IND AS, effective for April 1, 2016 opening balance sheet. In preparing these consolidated financial statements, the Company has applied the below mentioned optional exemptions and mandatory exceptions.

Notes to Financial Statements as on and for the year ended 31st March, 2018

36.2.1 Optional Exemptions Availed

a Property Plant and Equipment, Intangible Assets and Investment Properties

As permitted by para D5-D8B of Ind AS 101, the Company has elected to measure items of property, plant and equipment at its carrying value at the transition date.

b Determining whether an arrangement contains a Lease

Para D9-D9AA of Ind AS 101 includes an optional exemption that permits an entity to apply the relevant requirements in Appendix C of Ind As 17 "Leases" for determining whether an arrangement existing at the date of transition contains a lease by considering the facs and circumstances existing at the date of transition (rather than at the inception of the arrangement). The Company has applied the above transition provision and has assessed all the arrangements at the date of transition.

c Designation of previously recognised financial instruments

Para D19B of Ind AS 101 permits an entity to designate particular investments in equity instruments as at fair value through other comprehensive income (FVOCI) based on facts and circumstances at the date of transition to Ind AS (rather at initial recognition). The Company has opted to avail this exemption to designate its investments in equity instruments (other than investment in subsidiaries and associates) as FVOCI on the date of transition.

36.2.2 Mandatory Exceptions

a Estimates

As per para 14 of Ind AS 101, an entity's estimates in accordance with Ind AS at the date of transition to Ind AS at the end of the comparative period presented in the entity's first Ind AS financial statements, as the case may be, should be consistent with estimates made for the same date in accordance with the previous GAAP unless there is objective evidence that those estimates were in error. However, the estimates should be adjusted to reflect any differences in accounting policies.

As per para 16 of the standard, where application of Ind AS requires an entity to make certain estimates that were not required under previous GAAP, those estimates should be made to reflect conditions that existed at the date of transition or at the end of the comparative period.

The Company's estimates under Ind AS are consistent with the above requirement. Key estimates considered in preparation of the financial statement that were not required under the previous GAAP are listed below:

- -Fair Valuation of financial instruments carried at FVTPL and/ or FVOCI.
- -Impairment of financial assets based on the expected credit loss model.
- -Determination of the discounted value for financial instruments carried at amortized cost.

b De-recognition of financial assets and liabilities

As per para 82 of Ind AS 101, an entity should apply the derecognition requirements in Ind AS 109, "Financial instruments", prospectively for transactions occurring on or after the date of transition to Ind AS. However, para 83 gives an option to the entity to apply the derecognition requirements from a date of its choice if the information required to apply Ind AS 109 to financial assets and financial liabilities derecognized as a result of past transactions was obtained at the initially accounting for those transactions. The company has elected to apply the de-recognition provisions of Ind AS 109 prospectively from the date of transition to Ind AS.

c Classification and measurement of financial assets

Para 88 - 88C of Ind AS 101 requires an entity to assess classification of financial assets on the basis of facts and circumstances existing as on the date of transition. Further, the standard permits measurement of financial assets accounted at amortized cost based on facts and circumstances existing at the date of transition if retrospective application is impracticable.

Accordingly, the company has determined the classification of financial assets based on facts and circumstances that exist on the date of transition.

36.3 Impact of Transition to Ind AS

The following is a summary of the effects of the differences between Ind AS and Indian GAAP on the Company's total equity shareholders' funds and profit and loss for the financial periods previously reported under Indian GAAP following the date of transition to Ind AS.

Notes to Financial Statements as on and for the year ended 31st March, 2018

a Fair valuation of Investment

Under the previous GAAP, investments in equity instruments were classified as long-term investments or current investments based on the intended holding period and realisability. Long-term investments were carried at toxis and fair value. Under Ind AS, these investments are required to be measured at fair value at DCI.

b Property Plant & Equipment

The Company has elected to continue with the carrying value of all its Property, Plant and Equipment as recognised as of 1st April, 2016 (transition date) measured as per the previous GAAP and use that carrying value as its deemed cost as of the transition date.

C juventory

Land: Under previous GAAP, land has been values at the lower of cost and net realisable value. The same treatment applies as per Ind AS 2.

Notes to Financial Statements as on and for the year ended 31st March, 2018

d Deferred Tax

Indian GAAP requires deferred tax accounting using the income statement approach, which focuses on differences between taxable profits and accounting profits for the period. Ind AS 12 requires entities to account for deferred taxes using the balance sheet approach, which focuses on temporary differences between the carrying amount of an asset or liability in the balance sheet and its tax base. The application of Ind AS 12 approach has resulted in recognition of deferred tax on new temporary differences which was not required under Indian GAAP.

In addition, the various transitional adjustments lead to different temporary differences. According to the accounting policies, the company has to account for such differences.

 Under previous GAAP, there was no concept of other comprehensive income. Under Ind AS, specified items of income, expense, gains, or losses are required to be presented in other comprehensive income.

f Retained Earnings

Retained earnings as at April 1, 2016, where applicable, has been adjusted consequent to the above Ind A5 transition adjustments.

Other Financial Libilities	16,029.88	16,029.88	1,712.41	1,712.41	1,407.89	1,407.89	
Total Financial Liabilities	119,982.56	119,982.56	27,741.45	27,741.45	35,344.44	35,344.44	

- 38.7 The management assessed that the fair values of rash and cash equivalents, trade receivables, trade payables, short term borrowings, and other financial liabilities approximates their carrying amounts largely due to the short-term maturities of these instruments.
- 38.3 For Financial assets and liabilities that are measured at fair value, the carrying amounts are equal to their fair values.
- 38.4 The fair value of the financial assets and financial liabilities is included at the amount at which the instruments could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.
- 39 Fair Value Hierarchy
- 39.1 Financial Instrument

The following are the judgements and estimates made in determining the fair values of the financial instruments that are (a) recognized and measured at fair value and (b) measured at amortized cost and for which fair value are disclosed in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the company has classified its financial instruments into the three levels of fair value measurement as prescribed under the ind AS 113 "Fair Value Measurement". An explanation of each level follows underneath the tables.

Assets and Liabilities measured at Fair Value - recurring fair value measurements

As at 31st March 2018 and 31st March 2017

39.2 During the year ended March 31, 2018 and March 31, 2017 there are no transfers between level 1, level 2 and level 3.

39.3 Explanation to the fair value hierarchy

The Company measures financial instruments, such as, quoted investments at fair value at each reporting date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- 39.3.1 Level 1 hierarchy includes financial instruments measured using quoted prices. This includes listed equity instruments, traded bonds and mutual funds that have quoted price. The fair value of all equity instruments (including bonds) which are traded in the stock exchanges is valued using the closing price as at the reporting period. The mutual funds are valued using the closing NAV.
- 39.3.2 Level 2 The fair value of financial instruments that are not traded in an active market (for example, traded bonds, over-the-counter derivatives) is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific entire of all significant inputs required to fair value an instrument are observable, the instrument is included in level 2
- 39.3.3 Level 3 If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities, contingent consideration included in level 3.

40 Financial Risk Management Objective (Ind AS 107)

The Company's principal financial liabilities comprises of borrowings, trade and other payables. The Company's financial assets comprises of trade and other receivables, loans, investments and cash cash equivalents that derive directly from its operations.

Financial management of the Company has been receiving attention of the top management of the Company. The management considers finance as the lifetine of the business and therefore, financial management is carried out meticulously on the basis of detailed management information systems and reports at periodical intervals extending from daily reports to long-term plans. Importance is laid on liquidity and working capital management with a view to reduce over-dependence on borrowings and reduction in interest cost. Various kinds of financial risks and their mitigation plans are as follows:

40.1 Credit Risk

Credit risk is the risk that counterparty will not meet its obligations leading to financial loss. The Company has an established credit policy and a credit review mechanism. Credit exposure is undertaken only with large reputed business houses and with no history of default against payments. Based on the business model, macro economic environment of the business and past trends, the management has determined nill percentage for any class of financial asset under expected credit loss.

Notes to Financial Statements as on and for the year ended 31st March, 2018

40.2 Liquidity Risk

1

The Company determines its liquidity requirement in the short, medium and long term. This is done by drawings up cash forecast for short term and long term needs.

The Company manage its liquidity risk in a manner so as to meet its normal financial obligations without any significant delay or stress. Such risk is managed through ensuring operational cash flow while at the same time maintaining adequate cash and cash equivalent position.

Trade payables					
Other financial liabilities	1,407.89			-	1,407.89
Total	(64,655.56)	129,166.67	51,250.00	227,916.67	343,677.78

40.3 Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three type of risks: Foreign Exchange Risk, Interest Rate Risk and Other Price Risk.

40.3.1 Foreign Exchange Risk

Foreign Exchange Risk is the exposure of the Company to the potential impact of movements in foreign exchange rates. The management has assessed that exposure of the Company in foreign currency at the end of the year is Rs. Nii (2017: Rs. Nii), 2016: Rs. Nii)

Notes to Financial Statements as on and for the year ended 31st March, 2018

40.3.2 Interest Rate Risk

The Company is exposed to risk due to interest rate fluctuation on long term borrowings. Such borrowings are based on fixed as well as floating interest rate. Interest rate risk is determined by current market interest rates, projected debt servicing capability and view on future interest rate.

The Company is also exposed to interest rate risk on surplus funds parked in fixed deposits and loans. To manage such risks, such investments are done mainly for short durations, in line with the expected business requirements for such funds:

Exposure to interest rate risk

Particulars	31st March 2018	31st March 2017	1st April 2016	
Fixed Rate Instruments Financial Assets Financial Liabilities	42,403.42	47,902.71	46,928.77	
	42,403.42	47,902.71	46,928.77	
Variable Rate Instruments Financial Assets Financial Liabilities	343,952.68	366,029.04	342,269.88	
	343,952.68	366,029.04	342,269.88	

41 Capital Management

The Company objective to manage its capital is to ensure continuity of business while at the same time provide reasonable returns to its various stakeholders but keep associated costs under control. In order to achieve this, requirement of capital is reviewed periodically with reference to operating and business plans that take into account capital expenditure and strategic investments. Sourcing of capital is done through judicious combination of equity/internal accruals and borrowings, both short term and long term. Net debt (total borrowings less investments and cash equivalents) to equity ratio is used to monitor capital.

Particulars	31st March 2018	31st March 2017	1st April 2016	
Net Debt	(72,894.88)	(51,856.24)	(45,558.83)	
Total Equity	115,974.66	105,939.80	96,810.69	
Net Debt to Equity Ratio	(0.63)	(0.49)	(0.47)	

Notes to Financial Statements as on and for the year ended 31st March, 2018

42 Trade Receivables

Trade receivables are consisting of a large number of customers. The Company has credit evaluation policy for each customer and based on the evaluation credit limit of each customer is defined.

The Company assesses at each date of balance sheet whether a financial asset or a group of financial assets is impaired. Ind AS – 109 requires expected credit losses to be measured through a loss allowance. The company recognizes lifetime expected losses for all contract assets and/ or all trade receivables that do not constitute a financing transaction. For all other financial assets, expected credit losses are measured at an amount equal to the 12 month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

As at 31st March 2016

Ageing Schedule	6 months	6 months to 1 year	1 year to 2 year	2 years to 3 years	Above 2 years	Total
